

Business Data Analyst / Consultant – Energy

Description

AFRY is a European leader in engineering, design, and advisory services with a global reach and 16,000 engineers, designers and experts from all kinds of backgrounds, operating within the fields of infrastructure, industry, energy and digitalisation. As one of AFRY's divisions, AFRY Management Consulting is the leading advisor to the world's energy, forest and bio-based industries. Our dedicated team of over 500 consultants, across 17 offices on 3 continents provides strategic and operational advice across the value chain, underpinned by deep expertise and market insights. We deliver advisory services to leading energy companies, industrial players, financial institutions as well as governments

For our Vienna team, we are looking for professionals who are passionate about their own development and that of their team, as they are about the energy sector.

Responsibilities

In this role, you will have a unique opportunity to contribute to a sustainable transition of the energy sector for our projects in operational and digital transformation but also strategy and transactions. You will contribute to projects for leading Clients of the European Energy Industry and be at the forefront of the currently ongoing transformation, driven by sustainability and digitalisation. Depending on your

previous experience you will start with a higher share of Analyst work that can shift in the medium term to more Consulting oriented work.

Your responsibilities will include

- Development of digital services
- Supporting strategic and operational projects related to the digital transformation of the energy sector
- Helping energy companies define the right targets and implement them consistently in the corporate strategy as well as in organisations and processes
- Carrying out complex analyses, quantitative and qualitative
- Preparing our analyses and results in presentations and reports
- Contributing to a highly experienced and motivated team of consultants who work on challenging topics at management level across national borders

Qualifications

We are looking to enlarge our multi-disciplinary team with young professionals with real passion and curiosity for the energy transition. The ideal candidate will be or have experience in the following:

- You have an excellent academic degree preferably with a strong IT or information systems background
- You have strong analytical and communication skills and the ability to convey complex information in a clear and logical way
- You work thoroughly, have an eye for details and master MS Office, especially Excel, very well

Hiring organization

AFRY Austria GmbH

Employment Type

Full-time

Job Location

Kranichberggasse 4, 1120, Wien, Österreich

Base Salary

2.689,42 €

Date posted

7. March 2022

Valid through

22.03.2022

- Proficient in data analysis, modelling and visualization and are familiar with relational databases and related programming languages
- You have a high affinity for the energy sector or already gained first experience in the energy industry
- Ideally you have also been able to gather professional experience in an IT environment
- Very good German and English skills are required, further languages are advantageous
- It is important that you enjoy working in teams, often across national borders
- Above all, you have a pro-active and business-oriented mindset, the ability to take ownership, as well as a passion for helping our clients

Job Benefits

We offer you a challenging and exciting consulting work characterised by

- the unique chance to work with leading companies in the global energy industry,
- close interaction with our clients,
- belonging to an international team of supportive and qualified colleagues,
- a highly entrepreneurial and inspiring environment,
- flexible workplace agreements regarding times and location (e.g. Home Office)
- a range of different career opportunities oriented to fully develop your potential,
- a permanent position with a competitive salary, reviewed annually, and a performance related bonus scheme.

You will be continuously supported and receive direct feedback from one of our experienced consultants in order to grow your very own career path. Moreover, you can establish and grow a first network within the Energy Industry. We are also passionate about being an inclusive and diverse business where people are allowed to grow as individuals and as a team. AFRY is ready to offer an attractive and abovestandard, market-adequate salary, depending on your background and experience. For the matter of record, the minimum fixed gross salary for this position based on the collective labour agreement would be EUR 2.513,49 per month. We also offer a lunch allowance on workdays and a Vienna public transport card.

Contacts

Please apply with your CV and letter of motivation, stating job code 'BDAC', plus any other relevant credentials in support of your application via Application BDAC. If you prefer to share a video of motivation instead of a letter, please do so under [Motivation Video BDAC](#).

The questions we'd like you to answer in both letter or video are:

- What are my key competencies that will bring a return for the team? (Please answer in German)
- What do I think is a recent hot topic in the European energy industry? (Please answer in English)

Short-listed candidates will eventually be invited to a recruitment day at our office on 25th March 2022, where you will learn about AFRY in more detail and your further potential and suitability will be assessed. Your application will be treated strictly confidential and in line with GDPR regulations. We look forward to getting to know you!
